WASHINGTON, Jan. 26, 1850. The Late Circular of the Secretary of the Treasury

- The Expenses of Collecting the Revenue, &c.

I promised, in my letter of last evening, to give you an account of what is doing, and likely to be done, in regard to that most extraordinary public document known by the name of " Mr. Meredish's Circular." The nature of this singular production is not yet fully understood and appreciated by our commercial community; but politicians understand very well that Mr. Meredith, by embarrass ing and taxing the merchants, and throwing his shield over the office-holders in the Custom House,

Col. Hacket, of Georgia, is still dangerously ill.

families, and private persons. These laws and regulations are believed to be still in force, &c.

From there facts, it will appear, that Old Spain is far shead of us in the policy of granting lands to actual settlers; and the early regulations applied in California appear especially to have been of a wise and liber i character, much more so than the English restrictions upon their American colonies, and quite in contrast with the odious impositions of the British crown. And yet what England lost by her cupidity, Spain lost by her imbecility, to wit, her favorite colonies in America.

The Indians of the Great Basin, and the Rocky Mountains, near the Salt Lake. He recommends that they be taken under the protection of the government, and that they be encouraged in the arts of agriculture and such simple manufactures as their wants require. He thinks that "three parks," situated in the very midst of the Rocky Mountains, and far removed from the lines of overland travel of the white man, would make excellent colonies for the Indians. We make the following curious extract from this letter:

"Great Salt Lake Sept. 4, 1849.

"That pertion of the Shohones called Shococces, or Walkers, (being without horses) cannot now even go to where a buffalo is to be killed; and, consequently, are not only deprived of the meat so necessary for their support, but also of their skins, which are equally indispensable to make lodges and clothes to keep them from freezing in these mountains, where the perpetual snows are ever within their sight. The consequence is, that they are obliged to seek such holes and caves in the declivities of these 'everlasting hills,' as they can find, to keep them and their children from freezing. There are many warm and hot springs throughout this country, and it is said to be no uncommon thing to see these poor wretches sheltering themselves and their children from the bleaks and terrible atorum which prevail in these grand and runged mountains, by lying, during a great part of the day, and perhaps, night t

The Camden and Ambey Railroad—The Weather—Markets, &c.

The Niagara's news reached this city at an early hour yesterday moraing, or, rather, the first instalment of it. The impression in our mercantile community is universal, not that the published telegraphic reports of the steamer's news are unreliable, but that certain cotton and flour speculators get their despatches over the wires several hours ahead of the press, and the consequence is, that the moment a steamer is due, a spirit of mistrust seizes upon both buyers and sellers; large operations suddenly cease; and the daily sales are restricted to the immediate wants of the trade. This cautious feeling continues until the receipt of the private advices. The enterprise of a few New York journals (the Hereid always taking the lead) has extorted admiration as well as actonishment from both sides of the Atlantic. Unprompted and unassisted, they have shortened the distance between the old and new worlds two days, so far as the receipt of news is concerned. Let them complete what they have already so gloriously commenced, by adopting such measures as will effectually protect the news against the machinations of speculators.

I have reason to believe that Mr Cessna's amendment to the Reading Railroad bill will not be adopted, and that the bill will pass the House substantially in the same shape as it came from the Senate. If Mr. Cessna had been content with an amendment, inserting individual liability, it would have been agreed to, but he attempted too much, and the probability is that he will lose all. The truth is, the Reading Railroad is regarded more in the light of a public than a private work; and if legislation can at any time, help the company out of scrapes and difficulties, they are always sure of obtaining it. Legislation, to be sure, cannot create capital or pay bonds, but it can get rid of troublesome creditors.

A final decision has at length been made in the well-known case of Briggs, vs. the Camden and Amboy Rollinea, but of the production of the Markets, &c.

CITY TRADE REPORT.

Sarumay, January 26—6 P. M.

The merchants had not had time to digest their letters, and this being the last day of the west, trade, although somewhas more animated than it was prior to the receipt of the steamer's news, was yet rather limited as to the amount of transactions. The firmness consequent upon the telegraphic report of the news, published yesterday, was continued to day, and sales were made to a fair extent at about previous rates. The flour market was heavy, with moderate sales, at old prices for State and Western brands. Canadian was also dull at previous quotations. Wheat, both American and Canadian, was firm, but transactions were light. Corn was some firmer, with a steady demand. There was no marked change in other articles of breadstuffs. The pork market exhibited no change. Beef was heavy. Lard being in good demand in Liverpool, with an upward tendancy in prices, the article was held at better prices. Cheese and butter were nominally the same. Coffee being in the hands of few holders, was firm, and better prices asked. Sugars and molarses showed no marked change.

Asses.—Fearls, with a fair demand, were firm, at \$5 66 a \$6 12½. Tots were buoyant, with a fair inquiry, and sales of 75 bbls. at \$6 62½ a \$8 75.

The stock in the inspection warehouse is as follows: lates of Pedashes. bbls. 110 lates of Perlankes, bbls. 375.

SUGAR COATED COPAIVA PILLS.-DR. LANGENbeck's Copaiva Pils are universally acknowledged so
the best remedy which has ever been prepared for a sure and
complete cure of Gonorries. I hose unrivelled pills consist
of a vegetable compound, without mercorry, or any other and
stance which may be of injurious effects, and their application, evan in the worst stages of this disease, has been attended with unequalited runcess. The sugar cover serves to
remer the disease she lawer of the drugs and especially
that of the Cepsius Belsam; and next being above the size of

FOR INCIPIENT CONSUMPTION, WE KNOW OF NO better remedy than Wistar's Balsam of Wild Cherry. It is soothing and healing in its nature, and is admirably adapted to allay and dissipate that annoying and distressing irritation which so much prevails at this season of the year, caused by colds, coughs and chills, brought on by frequent and suden changes of the weather. We know of several severe cases which have been radically cured by the use of this Balsam. Some two years since a friend of ours was suffering under what was thought to be continued consumption—a severe cough, loss of appetite, night haveing courachments of the balsam, he dispensed to comparative good health.—New England Washingtonian, Boston.

Mr. B. W. Fowle: Having seen many certificates published in relation to Dr. Wistar's Balsam of Wild Cherry, Itake this opportunity of offering a word in its favor, which you are also at liberty to publish. A few months since my wife's lungs became so much affected by a sudden celd, that she lost her voice, and suffered severely from pains in the breast. Hoursham strongly recommended by those who had used it, I wurchased a bettle of your agent in this place. She sook is according to directions, and it preduced a wonderful effect, Before using one bottle she had completely recovered har voices, the pains subsided, and her health was soon fully restored. Yours truly, Signed J BENEY G BRIGHTMAIN.
